

**720**  
*MANUAL PIPETTE FILLER*

## DESCRIPTION

Ideal tool for serological and graduated pipetting applications using a variety of liquid media, aqueous solutions, acids, alkalis, and organic solvents. This instrument replaces old rubber bulbs and offers a well-designed combination of precision, speed, and reliability. Widely used in laboratories, universities, hospitals, research institutes, clinics, etc.

### TECHNICAL PARAMETERS

#### OPERATION MODE

Manual

#### SIZES

229 x 76 x 76 mm

#### PIPETTE TYPES

Glass or plastic pipettes

#### WEIGHT

160 g

#### FILTER

3 µm Hydrophobic

## KEY FEATURES

- Ergonomic and lightweight design helps to reduce fatigue associated with repetitive motions.
- Rubber bulb for effortless operation.
- Graduated and serological pipettes fit easily onto its flexible conical chuck.
- Blow button to expel residual liquid.
- Compatible with glass and plastic serological pipettes from 1 to 100 mL.
- Suction and discharge control lever.
- Easy to clean and maintain.
- Hydrophobic filter to protect internal mechanism.
