

SM1008
MINI CENTRIFUGE

DESCRIPTION

Ideal for microfiltration and quick spin-down centrifugation of microvolumes, such as separation of components, lysate of proteins, preparation of nucleic acids, etc. It is widely used in clinical, biochemistry, diagnosis, biotechnology, cellular and molecular biology laboratories, research institutes, and universities.

TECHNICAL PARAMETERS

MAXIMUM SPEED

7000 rpm

MAXIMUM RCF

2680 x g

ROTOR CAPACITY

8 tubes of 2, 1.5, 0.5 and 0.2 mL / 4x8-strip PCR tubes

NOISE LEVEL

≤45 dB

MOTOR

DC motor

DIMENSIONS

160 x 170 x 122 mm

WEIGHT

0.5 kg

POWER

20 W

POWER SUPPLY

100-240V, 50/60Hz

KEY FEATURES

- Fast and comfortable centrifugation, lid close so it begin to work.
- Automatic stop when lid to open.
- Quick-change rotor without any tool.
- Clear lid, easy-to-open and soft close.
- Compact size, ideal for workstations.
- Silent and easy operation, light weight.

STANDARD ACCESSORIES

- A8-2P rotor for 8 tubes
- A04-RCP8 for 4x8-strip PCR tubes
- Adapters
- Power supply adapter
